### UW Medicine VALLEY MEDICAL CENTER

### Greetings,

Thank you for choosing Valley Medical Center for your medical care. You are receiving this packet because you may be at a higher risk for slips, trips, stumbles or falls at home. It is never too early to start planning how to prevent falls. Begin your fall-prevention plan by making an appointment with your primary care doctor. Be prepared to answer questions such as:

- What medications are you taking? Make a list of your prescriptions, over-thecounter medications, and supplements to bring to your primary doctor appointment. Your doctor can review your medications for side effects and interactions that may increase your risk of falling.
- Have you fallen before? Write down the details, including when, where and how you fell. Be prepared to discuss instances when you slipped, tripped or stumbled but did not fall. Detailing events like these may help your doctor identify specific fall-prevention strategies.
- Could your health conditions cause a fall? Certain eye and ear disorders may increase your risk of falls. Be prepared to discuss your health conditions and how comfortable you are when you walk. For example, do you feel any dizziness, joint pain, shortness of breath, or numbness in your feet and legs when you walk?

Remember, falling is not a normal part of aging. The enclosed documents have helpful prevention tips, information, and home check-off sheets for you to use. I encourage you to review the enclosed information with a friend or family member. Please feel free to reach out to your primary care doctor or myself with any questions or comments.

Thank you,

Katherine Bendickson BSN, RN Trauma Program Manager | Valley Medical Center Katherine\_Bendickson@valleymed.org Office: 425.690.3034

### Four Things You Can Do to Prevent Falls:

### ① Speak up.

Talk openly with your healthcare provider about fall risks and prevention. Ask your doctor or pharmacist to review your medicines.

### ② Keep moving.

Begin an exercise program to improve your leg strength and balance.

### **③ Get an annual eye exam.**

Replace eyeglasses as needed.

### ④ Make your home safer.

Remove clutter and tripping hazards.

1 in 4 people 65 and older falls each year.

### Learn More

Contact your local community or senior center for information on exercise, fall prevention programs, and options for improving home safety, or visit:

### STEADI

### **Check Your Risk for Falling**

|         | Circle " | es" or "No" for each statement below  | Why it matters  |
|---------|----------|---|---|
| Yes (2) | No (0)   | I have fallen in the past year.   | People who have fallen once are likely to fall again.   |
| Yes (2) | No (0)   | l use or have been advised to use a cane or walker to get around safely.            | People who have been advised to use a cane or walker may already be more likely to fall.      |
| Yes (1) | No (0)   | Sometimes I feel unsteady when I am walking.  | Unsteadiness or needing support while walking are signs of poor balance.                      |
| Yes (1) | No (0)   | I steady myself by holding onto furniture when walking at home.                     | This is also a sign of poor balance.  |
| Yes (1) | No (0)   | I am worried about falling.   | People who are worried about falling are more likely to fall.                                 |
| Yes (1) | No (0)   | I need to push with my hands to stand up from a chair.                              | This is a sign of weak leg muscles, a major reason for falling.                               |
| Yes (1) | No (0)   | I have some trouble stepping up onto a curb.  | This is also a sign of weak leg muscles.  |
| Yes (1) | No (0)   | I often have to rush to the toilet.   | Rushing to the bathroom, especially at night, increases your chance of falling.               |
| Yes (1) | No (0)   | I have lost some feeling in my feet.  | Numbness in your feet can cause stumbles and lead to falls.                                   |
| Yes (1) | No (0)   | I take medicine that sometimes makes me feel light-headed or more tired than usual. | Side effects from medicines can sometimes increase your chance of falling.                    |
| Yes (1) | No (0)   | I take medicine to help me sleep or improve my mood.                                | These medicines can sometimes increase your chance of falling.                                |
| Yes (1) | No (0)   | l often feel sad or depressed.  | Symptoms of depression, such as not feeling well or feeling slowed down, are linked to falls. |
| Total   |          | Add up the number of points for each "yes" answer. If                               | you scored 4 points or more, you may be at risk for falling.                                  |

This checklist was developed by the Greater Los Angeles VA Geriatric Research Education Clinical Center and affiliates and is a validated fall risk self-assessment tool (Rubenstein et al. J Safety Res; 2011: 42(6)493-499). Adapted with permission of the authors.

# MyMobility Plan

# What can you do to stay independent?

Many people make financial plans for retirement, but not everyone plans for other changes that may come with age. This includes changes in your mobility—your ability to get around.

It's not easy to talk about, but as we get older, physical changes can make it harder to get around and do things we want or need to do—like driving, shopping, or doing household chores.

.....

1 in 4 adults now 65 will live to 90

You might not have mobility problems now, but you could in the future. You may even know others who already do—perhaps a parent, relative, friend, or neighbor. While it may not be possible to prevent all of these changes, there are actions you and your loved ones can take today, and as you age, to help keep you safe and independent tomorrow.

| MySelf  |  | MyHome                     |          | MyNeighborhood        |  |
|---|--|----------------------------|----------|-----------------------|--|

| independent   |  | safe at home               |          | in my community       |  |
| Centers for Disease<br>Control and Prevention<br>National Center for Injury<br>Prevention and Control |  | revention<br>or for Injury | Stay ind |                       | lake a plan today.<br>endent tomorrow. |

### MySelf | A plan to stay independent

Staying healthy and managing chronic conditions help maintain your mobility.

To start building your plan, complete the checklist below.

### □ Get a physical checkup each year.

Some health issues may increase your risk of falling (such as leg weakness and balance problems).

### Last Exam Date: \_\_\_\_\_

Next Exam Date: \_\_\_\_\_

# Review all your medicines with a doctor or pharmacist.

Certain medicines can have side effects that can change your ability to drive, walk, or get around safely. To learn more, go to: https://go.usa.gov/xPADs

### □ Get a medical eye exam each year.

Eye problems can increase your risk of falling or being in a car crash.

Last Exam Date: \_\_\_\_\_

Next Exam Date: \_\_\_\_\_

### MyMobility Tip 🔊

Good eyesight is about more than 20/20 vision. For example, you need to see well in the dark to drive safely at night.

Get a medical eye exam each year and address any issues.

### □ Follow a regular activity program to increase your strength and balance.

Strength and balance activities, done at least 3 times a week, can reduce your risk of falling. Other activities, like walking, are good for you, but don't help prevent falls. Visit the National Institute on Aging's website for suggestions: www.go4life.nia.nih.gov/exercises

| Strength    | Activity    | Balance  | Activity    |
|-------------|-------------|----------|-------------|
| Exercise    | Start Date  | Exercise | Start Date  |
| Chair stand | Next Monday | Tai Chi  | Next Monday |
|             |             |          |             |
|             |             |          |             |

### **MyHome** A plan to stay safe at home

To continue your plan, schedule a time to go through the following home safety checklist to help prevent falls.

# Check the FLOORS in each room and reduce tripping hazards:

- □ Keep objects off the floor.
- □ Remove or tape down rugs.
- Coil or tape cords and wires next to the wall and out of the way.

### Check the KITCHEN:

- Put often-used items within easy reach (about waist level).
- For items not within easy reach, always use a step stool and never use a chair.

### Check the BEDROOMS:

- Use bright light bulbs.
- Place lamps close to the bed where they are within reach.
- Put in night-lights to be able to see a path in the dark. For areas that don't have electrical outlets, consider battery-operated lights.

# Check inside and outside STAIRS and STEPS:

- Check for loose or uneven steps.
  Repair if needed.
- Make sure carpet is firmly attached to every step, or remove carpet and attach non-slip rubber treads.
- Check for loose or broken handrails.
  Repair if needed.
- Consider installing handrails on both sides of the stairs.
- Use bright overhead lighting at the top and bottom of the stairs.
- Consider putting light switches at both the top and bottom of the stairs.

### Check the BATHROOMS:

- Put non-slip rubber mats or self-stick strips on the floor of the tub or shower.
- Consider installing grab bars for support getting in or out of the tub or shower, and up from the toilet.

### MyMobility Tip 🐲

Falls are more likely when wearing inappropriate footwear, such as flip flops that don't cover the heel.

Wear safe shoes that fit well, have a firm heel to provide stability, and have a textured sole to prevent slipping.

For more home modification information and resources: https://go.usa.gov/xUEs3

.....

# MyNeighborhood A plan to stay mobile in my community

Finish your plan by filling out the table below.

Think of all the places you go and how you get there.

Then, consider how you would get to these same places if you couldn't use your current way.

| □ Find transportation | options in your ZIP code: |
|-----------------------|---------------------------|
|-----------------------|---------------------------|

Rides in Sight
 1-855-607-4337
 www.ridesinsight.org

Ride share services can help keep you connected to family and friends. Staying social helps maintain quality of life as you age.

| Where do I go now?<br>(Such as doctor, grocery store,<br>or physical activity class) | How do I get there now?<br>(Such as drive, get a ride,<br>or use public transportation) | How will I get there<br>in the future?<br>(Such as bus, rideshare, or<br>ride with a friend) |
|--|---|--|
| Meet friends for lunch   | Drive myself  | Get a ride from a friend   |
|  |   |  |
|  |   |  |
|  |   |  |

### □ Consider a driver refresher course.

Some insurers give a discount on your car insurance for taking a course:

- AARP (888) 687-2277 or www.aarp.org
- AAA (800) 222-4357 or www.aaa.com

### MyMobility Tip 🐐

Practice safe behaviors, such as always wearing a seatbelt, as a driver or a passenger.

### For more information visit:

www.cdc.gov/motorvehiclesafety/older\_adult\_drivers/mymobility

# **Exercises for Fall Prevention**

Physical activity is the single most important thing you can do to reduce your fall risk

# **Chair Rise Exercise**

#### Instruction

- Begin sitting at edge of chair
- Feet flat on the floor
- Arms across chest
- Stand up fully, then sit down slowly with control
- Do as many as you can (with control) in 30 seconds

#### Why Do It?

 Inability to stand up and sit down repeatedly without the use of arms is a risk for falls

### Check your risk

| Number of stands in 30 seconds<br>Values below norms listed indicate risk for falls |      |        |  |
|---|------|--------|--|
| Age   | Male | Female |  |
| 60-69   | 12   | 11     |  |
| 70-79   | 11   | 10     |  |
| 80-89   | 8    | 8      |  |

### To Add More Challenge:

- Try to take 5 or more seconds to lower
- Rise up *quickly* with speed and control
- Sway arms up overhead as you stand
- Place one leg slightly more forward
- Place one leg slightly out to side
- Stand up as shown, then take a step and reach as if about to get out of a chair to shake someone's hand
- Sit part of the way down, then rise to stand
- Have a family member tell you to quickly (and randomly) *change* your movement to either standing or sitting
- Try with eyes closed—have family member next to you initially for safety Do any of the variations in combination

#### Safety First:

- Make sure your doctor has cleared you to exercise before attempting!
- Do not attempt this exercise or any variations unless you feel safe.
- Stop this exercise or make it easier if you notice pain, shortness of breath or racing heartbeats.

### If Too Difficult:

- Stand from a higher surface such as a bed
- Add a cushion to the chair
- Use hands on arm rests or hands on thighs to help push up
- Have a family member stand next to you

# **Exercises for Fall Prevention**

Physical activity is the single most important thing you can do to reduce your fall risk

# **Ankle Sways**

### Instruction

- Begin standing with feet hip-width apart
- Have a chair in front of you for safety
- Shift your weight to the right side as far as possible, then return to center
- Repeat to the left side
- Keep your feet flat on the floor
- Do not bend at the waist.
- Imagine that you are a tree swaying and make your movement come from the ankle
- See how far you can shift

### Why Do It?

- The ability to make small adjustments at the ankle is critical for balance
- Research has shown that repeated fallers are less able to react at the ankles to maintain balance
- The greater you can shift your weight without bending at the waist, or taking a step, the greater your "limits of stability" which will allow you to do more activities with greater confidence

### To Add More Challenge:

- Stand with feet closer together
- Add different directions (see graphic)
  - Note: backward sways most challenging
- If able, let go of the chair and pretend to hold an imaginary ball or gently reach with an arm in the direction that you are shifting your weight, but do NOT bend at the waist
- Vary the speed: slow, fast
- Pause at the farthest point that you can shift
- Avoid stopping in the center, make random patterns as you shift

#### Safety First:

- \* Make sure your doctor has cleared you to exercise before attempting!
- Do not attempt this exercise or any variations unless you feel safe.
- Stop this exercise or make it easier if you notice pain, shortness of breath or racing heartbeats.

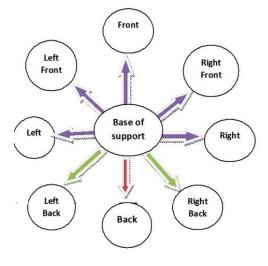

#### For questions about this pathway, email: AmbulatoryCarePathways@valleymed.org

### If Too Difficult:

- Stand with feet wider apart
- Stand in a corner with a chair in front
- Have a family member stand next to you
- Begin with tiny slow movements

# **Exercises for Fall Prevention**

Physical activity is the single most important thing you can do to reduce your fall risk

# Weight-Shifting

### Instruction

- Stand behind a chair with one foot forward at a diagonal as shown
- Keep feet flat on the floor
- Start by shifting all your weight onto the back leg
- Then shift all your weight onto the forward leg
- Extend an arm gently forward, but do NOT bend at the waist
- See how far you can shift your weight in each direction

### Why Do It?

 This exercise works on balance needed just before taking a step forward or backwards

### To Add More Challenge:

- Shift further forward and lift back heel up
- Shift farther back and raise front toes up
- Vary the speed: slow, fast
- Pause at furthest limit
- Try not to hold chair

### If Too Difficult:

- Widen your stance
- Start with small slow movements
- Have a family member stand beside you

#### Safety First:

- \* Make sure your doctor has cleared you to exercise before attempting!
- **\*** Do not attempt this exercise or any variations unless you feel safe.
- Stop this exercise or make it easier if you notice pain, shortness of breath or racing heartbeats.

# **Transportation Resources**

### Volunteer/No Cost Transportation

#### Sound Generations Volunteer Transportation: 206-448-5740

https://soundgenerations.org/our-programs/transportation/volunteer-transportation/

- Patient must live in King Co, age 60+, able to transfer into a vehicle with minimal assistance.
- Rides must be called in the Tuesday prior to any appointments the following week.

#### Hyde Shuttle: 206-727-6262

https://soundgenerations.org/our-programs/transportation/hyde-shuttle/

- Door to door van service for adults 55+ and adults with disabilities in many King County cities.
- Operates 8 AM-4 PM and shuttles only travel inside city limits of participating cities. See website for current list of cities participating.

#### Catholic Community Services Volunteer Transportation: 844-851-9380

https://ccsww.org/get-help/services-for-seniors-people-with-disabilities/volunteer-services/volunteer-services-king-county/

• Limited services at this time due to COVID-19, some outside yard work and grocery/medication deliveries

#### HopeLink: 800-923-7433

https://www.hopelink.org/need-help/transportation

• For Medicaid clients only (that have Apple Health or have CNP/CNP-QMB)

### **Fee-based transportation**

#### TriMed Cabulance: 206-988-5000

https://www.trimedambulance.com/cabulance/

• Fees approximately \$85 one-way, services King County.

#### Northwest Transport: 800-600-9225

http://www.nwt1cabulance.com/

• Non-emergency cabulance and ambulatory transport for King, Pierce and Snohomish County. See website for rates. Door to door service.

#### Around the Sound: 253-858-7088

https://atstrans.org/medical-transportation/

• Non-emergency cabulance transportation, serves Puget Sound area

#### Tri-County Cabulance: 206-553-1003 or 425-775-8358

#### http://tricountycabulance.com/

• Non-emergency cabulance transportation, serves King and Snohomish County

### **Help Lines**
